

a journey

to celebrate knowledge

Knowledge Partner: Shanti Educational Initiatives Limited (SEIL)

Vision

To mould young minds into community leaders

Mission

To create a joyful school environment that will generate happy, righteous and quality individuals, equipped to make right choices in life and grow up to be responsible citizens of the world.

Birds signify the freedom one has to dream and work towards fulfilling aspiration.

Earth symbolizes the need to be rooted to the principles

and universal laws while exercising one's freedom.

Water indicates the adaptation and flexibility to initiate change wherever needed & flow with life.

If one understands these well, Lotus, the victory is inevitable.

Red leads, Blue heals, White purifies and Black strengthens

Education is that which liberates.

Message from the Chairman

"He will have to learn, I know, that all men are not just and not true.....Teach him always to have sublime faith in himself because, then he will have faith in human kind. This is a big order, but see what you can do. He is such a fine little fellow, my son."

Abraham Lincoln

If I relate Abraham Lincoln's vision of an educator to the current, modern classrooms, educators are expected to role model and nurture qualities which help children balance all dimensions of life. A big order even for super talented GURUS. We are honored to take up this challenge as we continue our journey in education with a talented team of trusted people.

We at Shanti Educational Initiatives believe that education is what remains after one forgets all that has been taught. It is beyond academics. It is learning from life. With this as the core purpose, the focus is on the future. We invite you to experience this journey of excellence as a co-traveller.

Jai Hind

Regards,

Ved Prakash Chiripal

Tools:	Rigour and Relevance/Care and Concern
Process:	By nurturing appropriate relationships By encouraging creativity & sensitivity Main Tool – Role Modeling Added Tool – I st Learning Ladder
Stages:	Dependence > Independence > Interdependence
Target Skills:	Technology/Team Work/Interpersonal
On Task:	Enabling our children to speak their minds politely with humility and dignity.
Curriculum:	A balanced combination of core Academics and Multiple Intelligences.
By-Product:	Global Citizenship

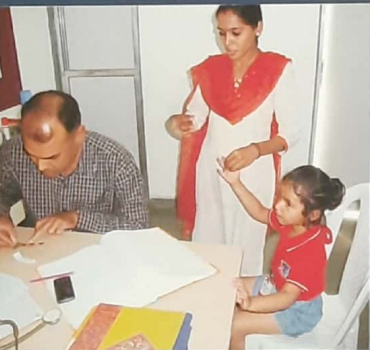

Faculty at SAS

SAS follows comprehensive and exhaustive processes for spotting and bringing in talented faculty to the school. They are gauged rigorously for various parameters before they are selected. SAS enables them to align their personal vision and aspirations towards education to the common goal of the school. Various faculty empowerment programmes are a part of SAS culture to keep abreast with the latest trends in education.

Extended School

Shanti Asiatic's Extended School Program is another initiative to further our vision of ensuring Holistic Development of our children. A Program that offers beyond school hours academic guidance, activity based engagement and a comprehensive physical development routine. This is done under the guidance of educators and experts.

Wellness Program

SAS organizes health checkups and medical camps for its students to check / certify basic health standards or to refer for further medical interventions. Meeting and sessions with eminent people of medical field are arranged at regular intervals for all stake holders. SAS believes that Health is the only Wealth.

Partnership with Parents

Communication between School and Parents is the key to a good relationship. We regard Parents as co-educators and we create various opportunities for Home and School to work together. Parents speak their minds clearly and get involved in the open environment of our school.

Academic Program at Shanti Asiatic School

The academic program in our school is an outcome of intensive research and development with various educational organizations across the nation. Special focus is given on foreign language learning to prepare them for global citizenship. Freedom of thought, freedom of expression and learning beyond books is encouraged through an inquiry based learning approach.

I = Inquisitiveness

1

Step one of learning is to get the child inquisitive about a subject, topic, object and concept. It is truly believed that unless one is not curious enough to learn the sole purpose of learning is diluted. Curiosity is the first step to learning.

I = Inquiry attitude

2

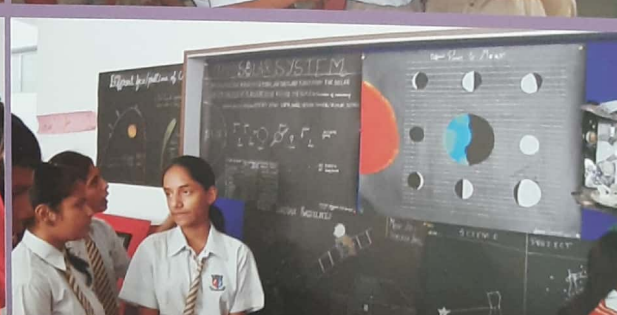

Step two is to ensure that the curiosity developed is sustained. This is achieved by giving constant encouragement to him / her to inquire, ask random or relevant questions and in the process build a healthy inquiry based learning approach.

I = Innovation

3

Step three is to allow the child to think, recreate and innovate making it an experience that he / she cherishes for life. At the end of the day learning is all about remembering one's own experiences.

'I like the teacher who gives me something to take home to think and explore.'

Beyond the Classroom

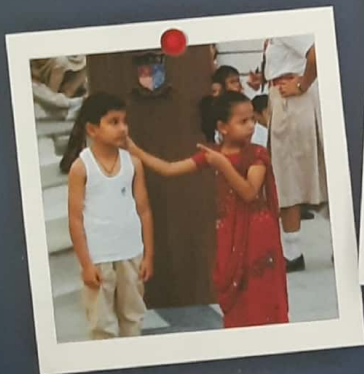

Prabhat

A distinctive platform to explore and exhibit overall aptitude of our children with special focus on Science & Multiple Intelligences, and encourage the parents to be a part of SAS learning community.

Prayaas

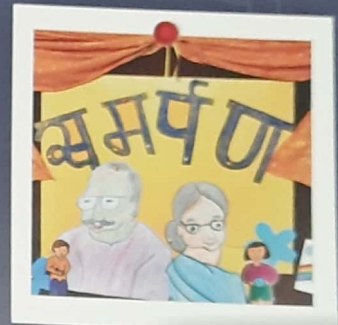

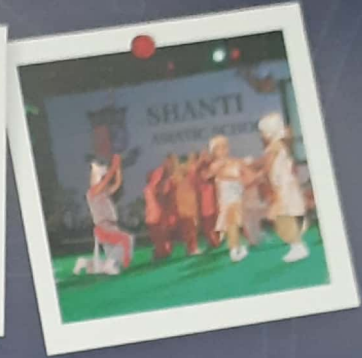

Community Drive : An initiative with an aim of educating and sensitizing the children and community as a whole through workshops, discussions, field work etc. on various national & global issues like nature conservation, cleanliness drive, child labour and many more.

One who dares to teach must never cease to learn

Aashayein

A unique platform to showcase the talent of our enthusiastic children through varied forms of performing arts and cultural events.

A warm gesture to reaffirm our love and respect for grandparents who over the years, have given us unconditional love, care and affection and have made us what we are today.

Samarpan

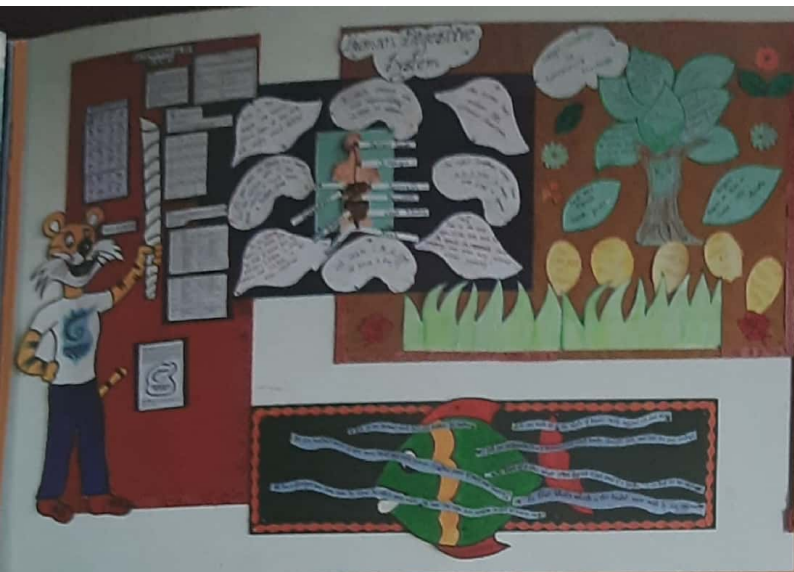

Infrastructure

The infrastructure at SAS is an outcome of the needs and aspirations of modern learners. The entire infrastructure has been made keeping in mind how to stimulate a child's mind once inside the campus.

The campus provides the following facilities for Holistic development of the child:

- Specialized colorful and vibrant pre-school classrooms with lots of scope for tiny tots to explore and learn and Interactive classrooms for older children that are IT and AV enabled.
- Computer labs with unlimited access to learn computer as a subject and also to use as knowledge management tool.
- IT enabled Knowledge Centers powered by broadband internet with professional tie-ups.
- State of the Art Library with IT and multimedia facilities, networked with the Knowledge Center.
- Science, Language and Maths labs.
- Fine Art ,Design Center and Digital Art under the guidance of eminent faculty.
- Studios for global exposure in performing arts with emphasis on classical, semi-classical, western form of dance and music at SAS.
- Amphitheater for theatrical and musical performances.
- A fully air-conditioned auditorium where students can showcase their talents in a wide array of activities.
- Ample sports facilities comprising courts and grounds for Badminton, Volleyball, Basketball, Soccer, Rugby, Skating, Sandpit and Splashpool.
- Gymnasium and Meditation center for building of a healthy body, mind and soul.
- Dedicated R&D center headed by the Principal to encourage innovation.
- In house medical center.
- Best software solutions in the country to deal with classroom challenges.
